My name is Syamsi Nur Fadilah, and I am a fifth-semester student majoring in Information Systems at Universitas Bina Sarana Informatika. I have a strong passion for technology, particularly in programming, web development, and the latest innovations. This enthusiasm drives me to continuously learn, stay updated with new advancements, and enhance my skills.

With a background in Information Systems, I aim to build a solid foundation for understanding technology on a broader scale. I aspire to become a Junior Frontend Developer who can contribute to creating innovative solutions in the field of web development.

Project

- **Summit Journey** 2024
 - Build with HTML, CSS, JavaScript
 - This website was created to fulfill the final assignment/submission for the Basic Web Programming class organized by Dicoding Academy in collaboration with IDCamp. The website was built using semantic HTML techniques and layouting with Flexbox.
- **Puskesmas Website Prototype** 2024
 - Build with figma
 - This project is a Puskesmas website prototype designed using Figma to fulfill the requirements of the Management Information Systems course in the third semester. Developed in a team, this prototype includes features such as patient registration, queue numbers, doctor schedules, medical history, and medication information. Additionally, it provides an admin page for data management and a doctor page for easy access to patient information and schedules.

Courses

- **Fundamental Web Programming, Dicoding** 2024
 - The online Fundamental Web Programming course from Dicoding teaches the basics of web development, covering HTML for content structure, CSS for styling and layouting (including Flexbox and Grid), and JavaScript for interactivity and DOM manipulation.

Education

- **Universitas Bina Sarana Informatika**
 - Information Systems
 - GPA : 3.85

Skills

- **Softskills**
 - Problem Solving
 - Communication Skills
 - Time Management
 - Collaboration & Teamwork
- **Hardskills**
 - HTML
 - CSS
 - JavaScript
 - Figma
 - Laravel
